CPR, AED, First-Aid certifications

FARMERS INSURANCE
Sales Representative

FREELANCE DEVELOPER
Full stack development

ABOUT ME

I am a hardworking person in regards to web development. From an early age I taught myself how to program, and I pursued this dream job by enrolling in a code bootcamp after high school. This has given me the ability to work and gain experience while finishing my degree.

I enjoy working independently through freelancing and side-projects but I also work well with a team that exposes me to a wide array of diverse creative ideas.
